

Federal Sexual Health Commission's PrEP recommendations published January 2016

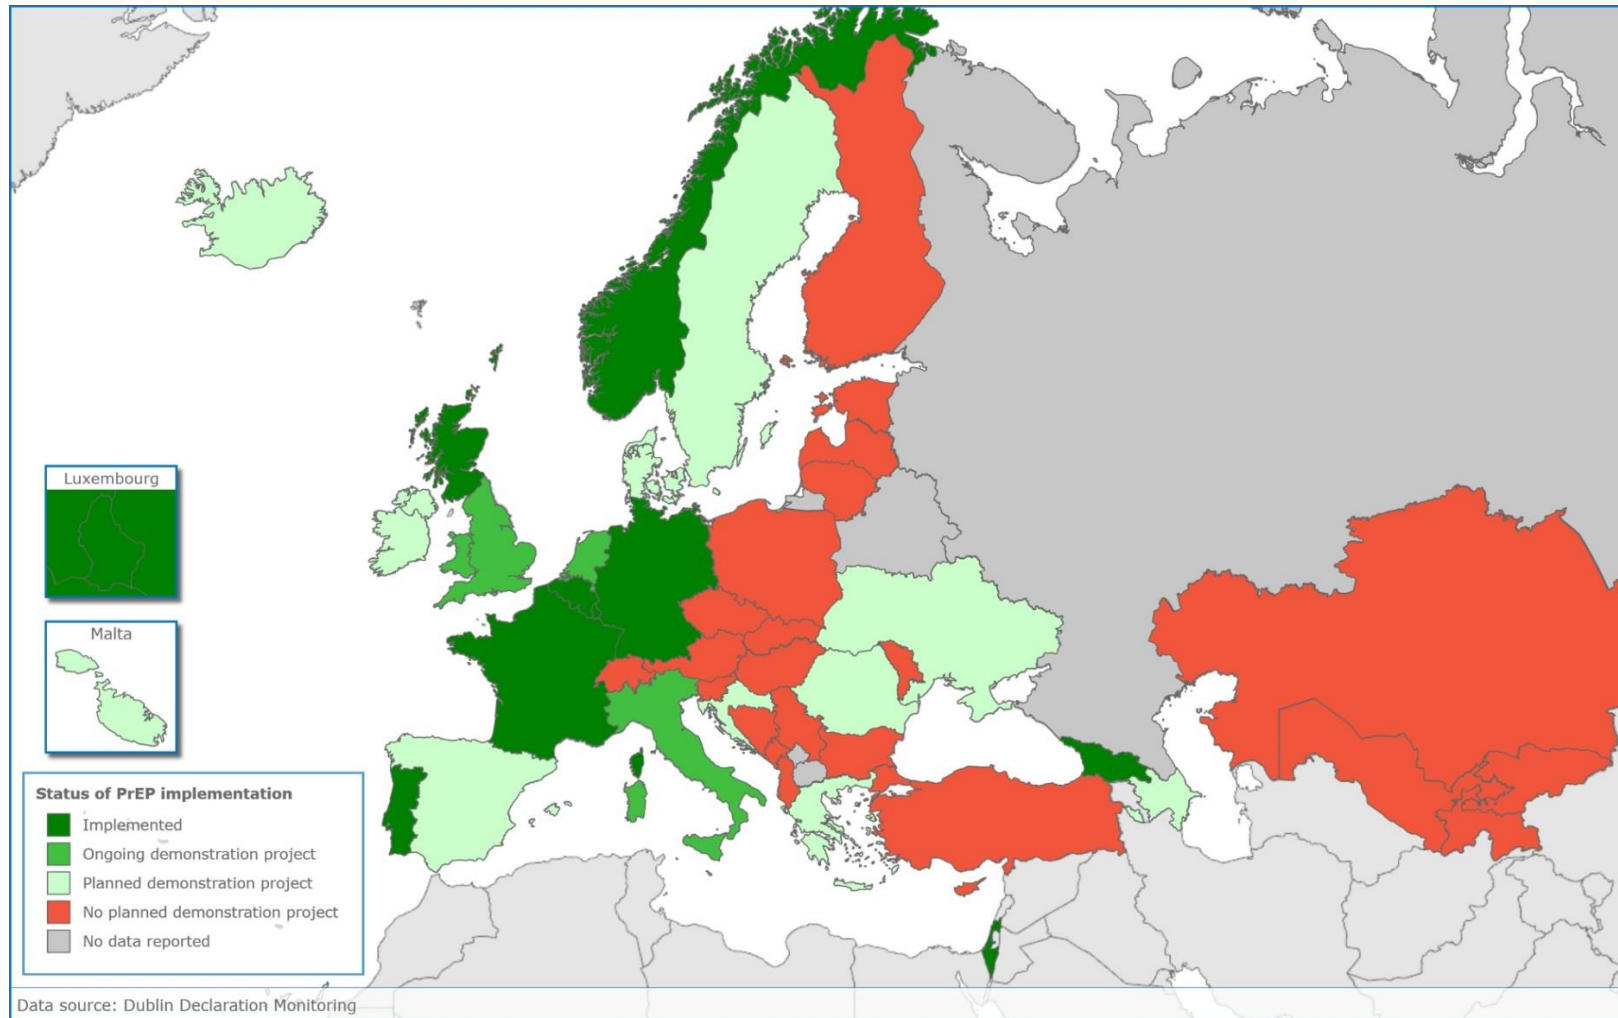

„The principal benefit of PrEP in Switzerland is for persons at high risk of HIV transmission, such as HIV negative MSM » :

- reporting unprotected anal sex with at least two or more partners in the last six months(AI);
- presenting with an IST multiple times
- having required à Pep within the last year
- frequently using psychoactive substances during sex

...PrEP may also be of benefit to persons having difficulty negotiating « safer sex » (vulnerable populations).

PrEP implementation in Europe (10/2017)

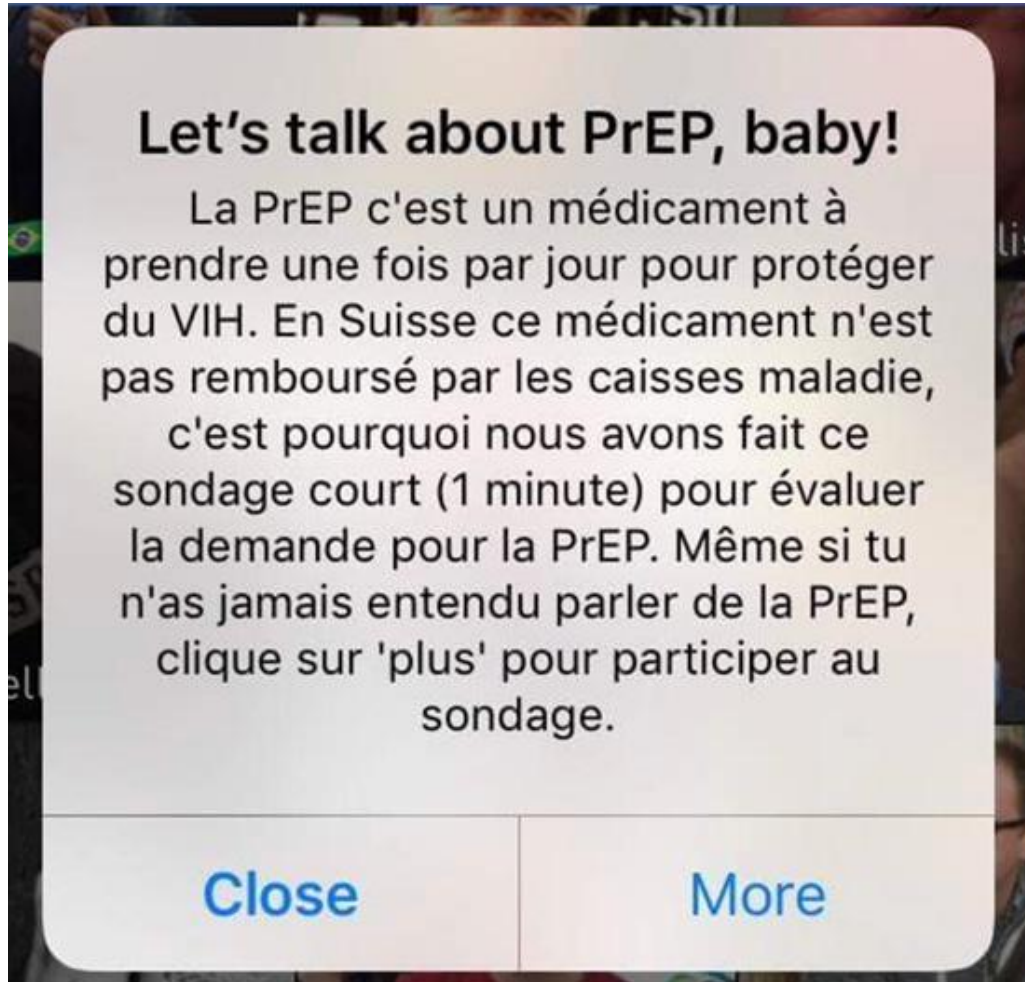

PrEP – *Swiss* *studies*

PrEP: Grindr® Study

- Grindr® is a social media who's target population are MSM. From January 5th to the 24th 2017, users were asked to participate in an online survey.

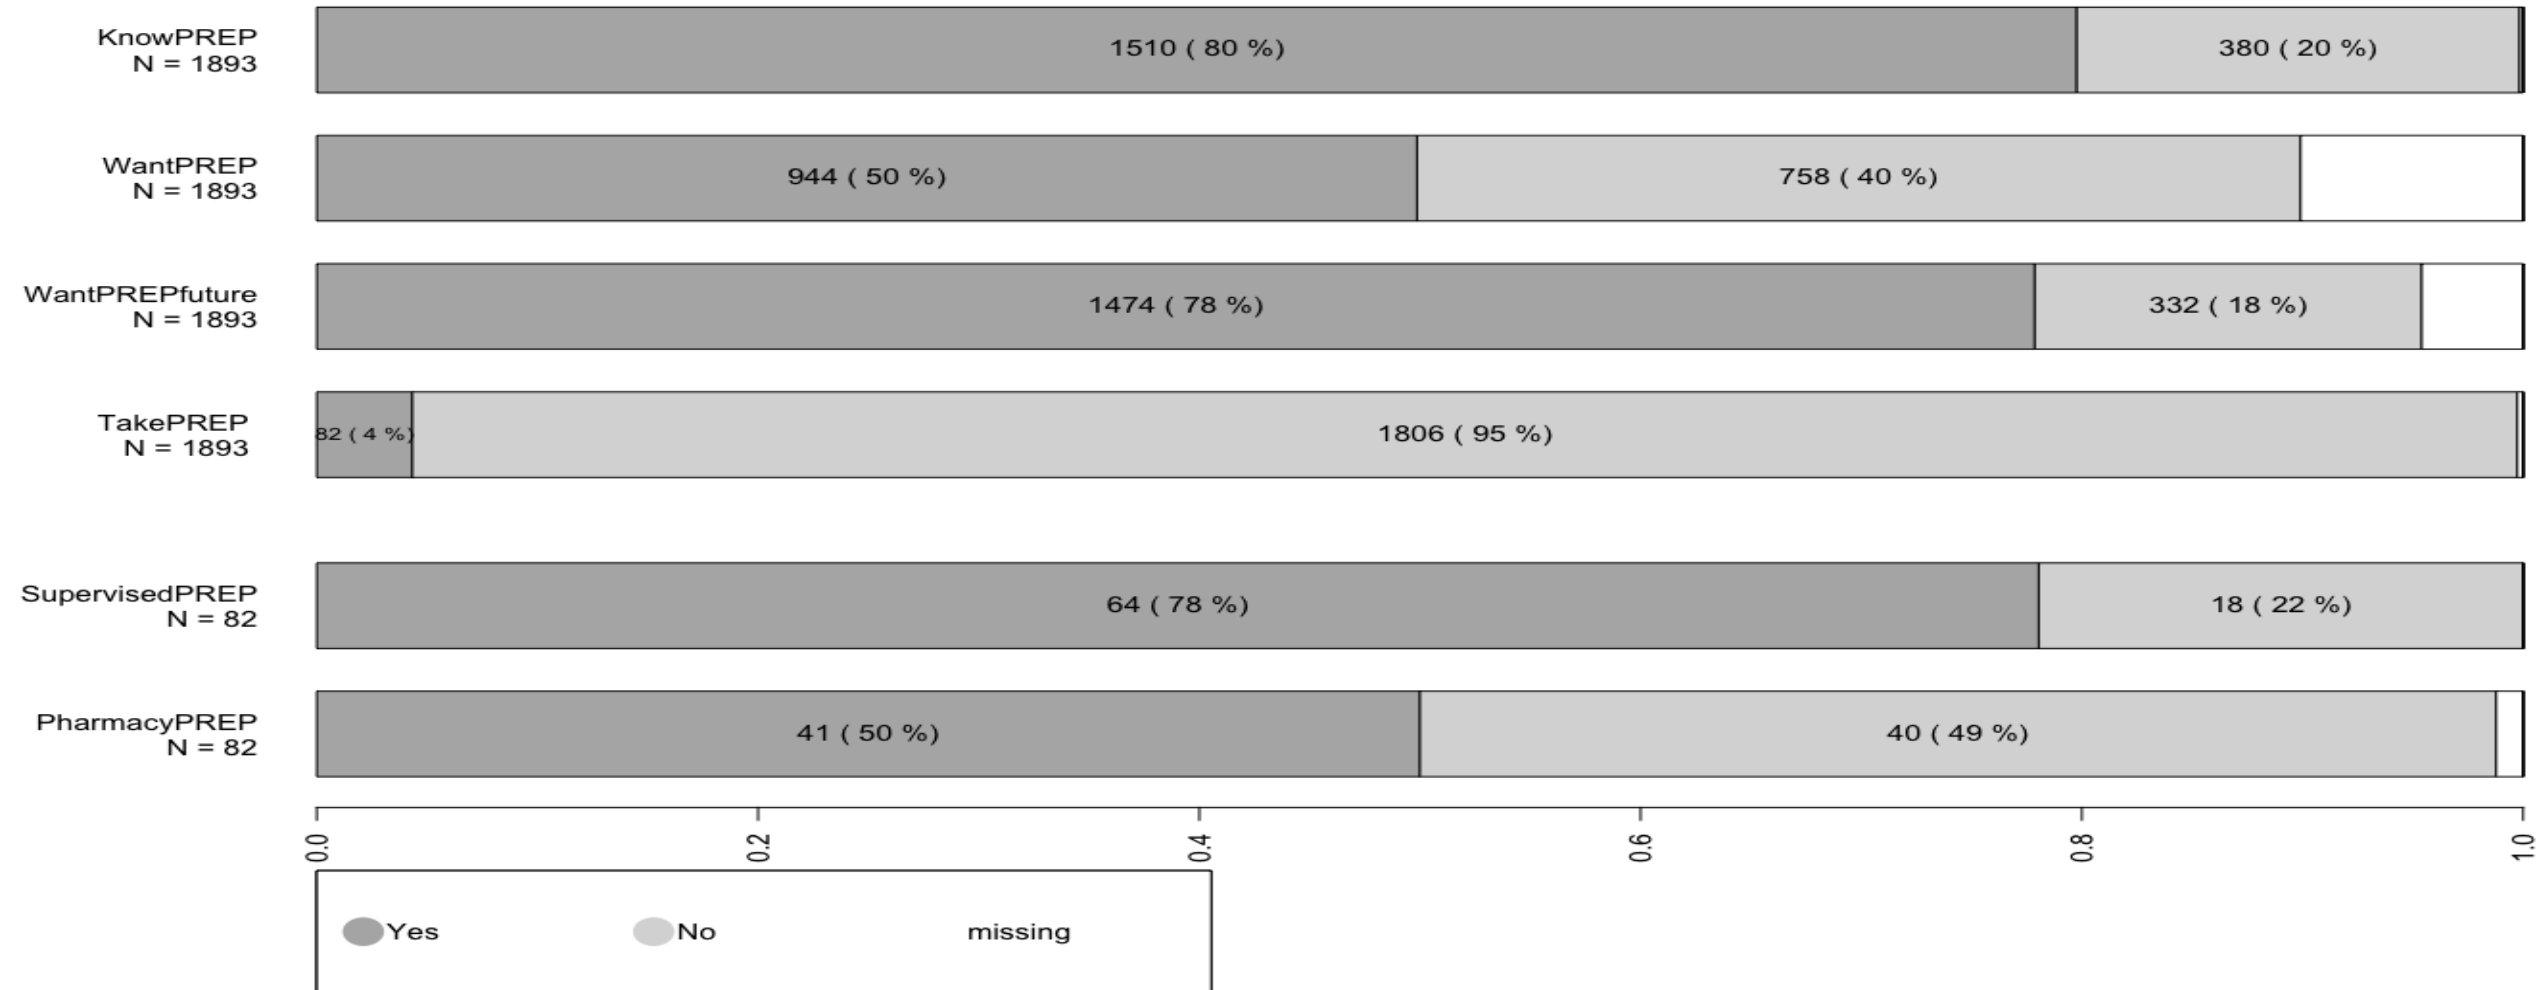

PrEP: Grindr® Study

- Responses from 1893 individuals were analysed
 - 82 participants (4.3%) were on PrEP
 - of which, 64 (78%) stated they were taking PrEP under medical supervision.
 - 7 on PrEP (9%) didn't get an HIV test in the last 12 months.
 - 944 participants (49.9%) would considered starting PrEP in the next 6 months, and 1474 (77.9%) would in the future.

PrEP: Grindr® Study

PrEP: HIV Doctors Survey

✓ **Cross-sectional survey (descriptive)**

- 14/03/2017 to 24/04/2017
- Online questionnaire

✓ **Target population: HIV Doctors**

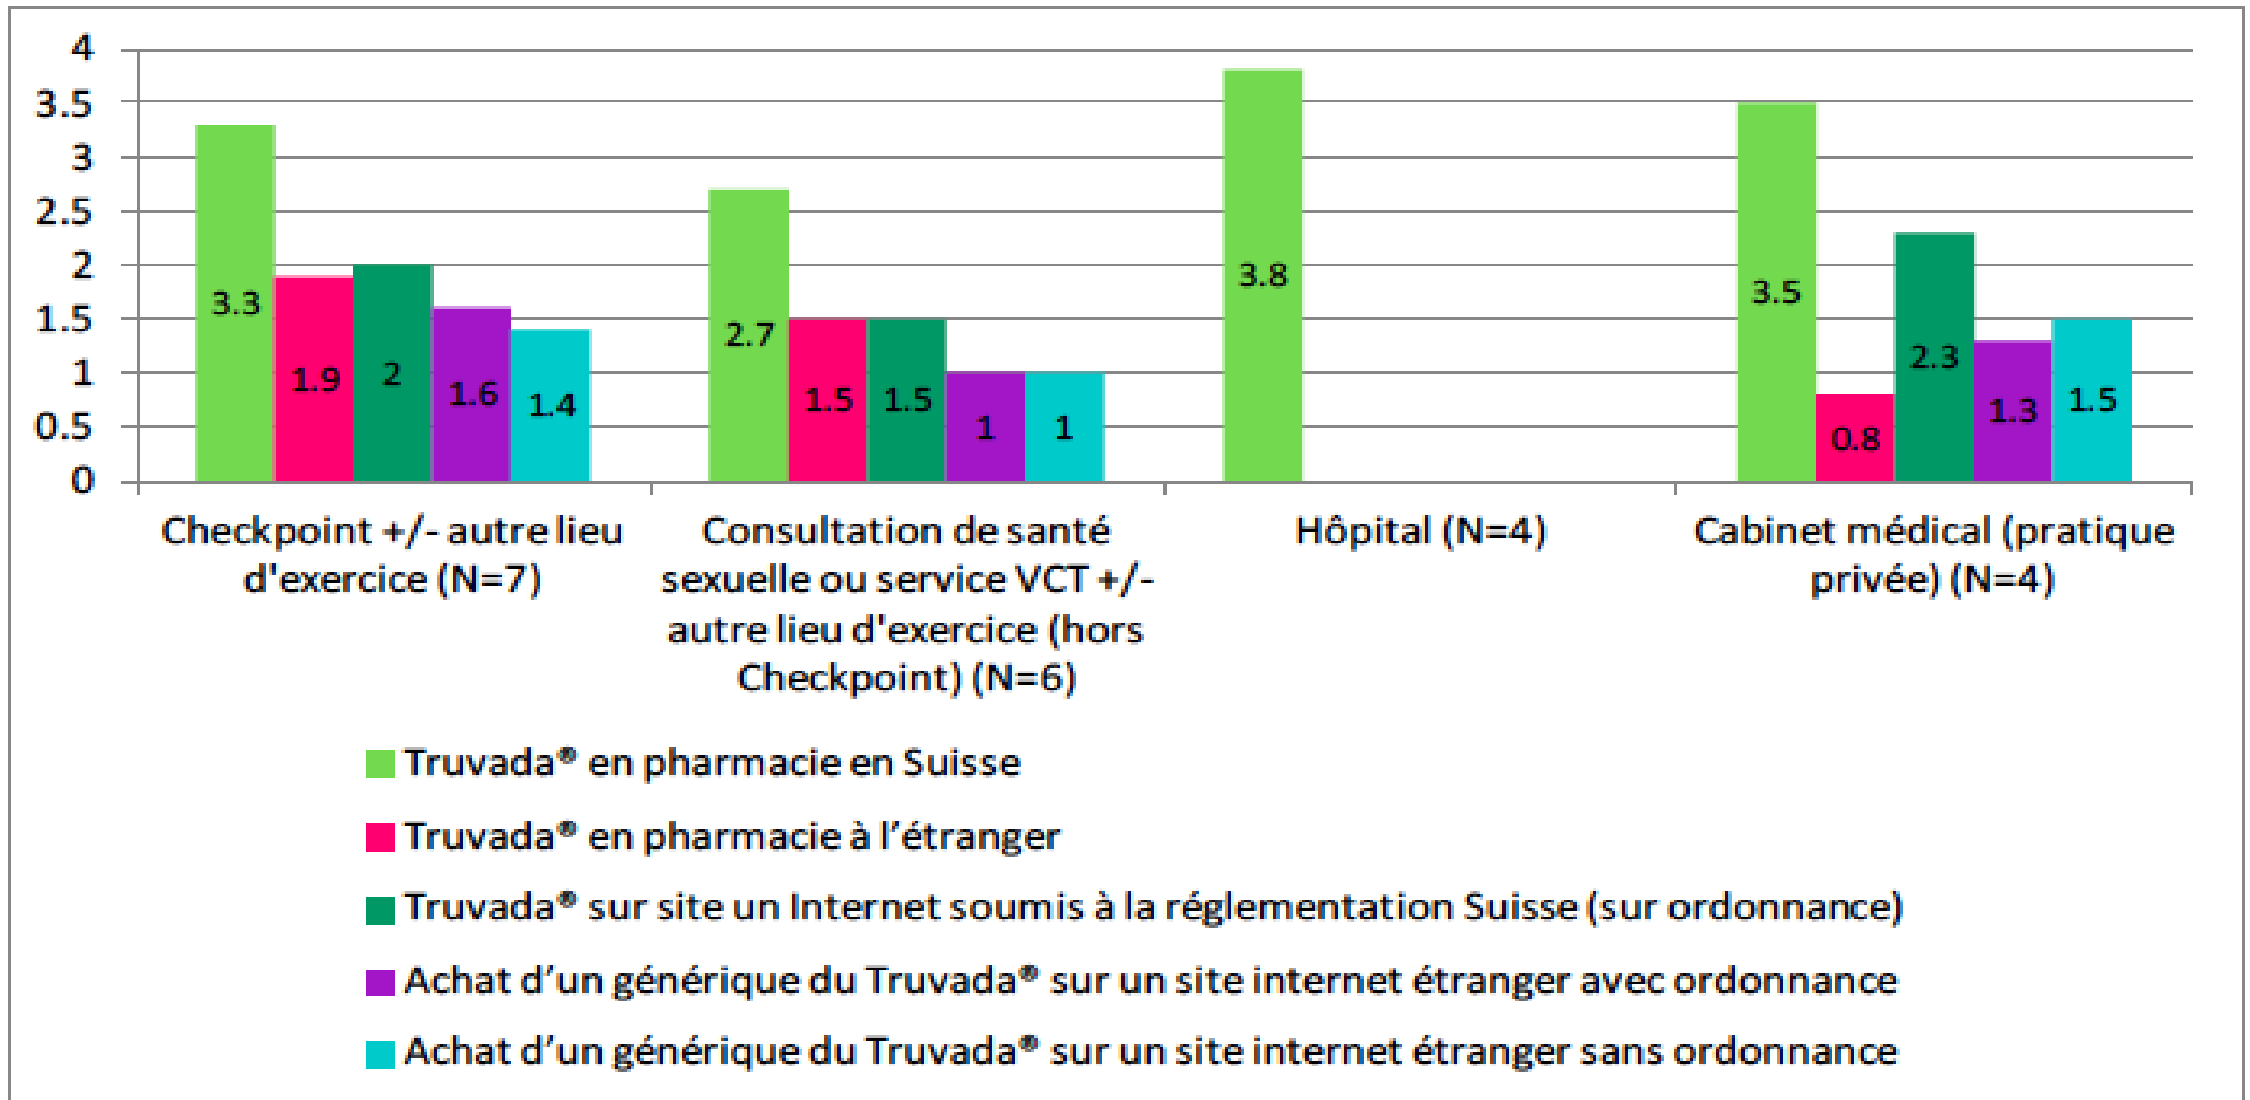

- Heads of volunteer counselling and testing facilities
- SHCS Partners (Swiss HIV Cohort Study)

Tableau 3 Evolution de la demande pour la PrEP parmi les patients durant les 12 derniers mois (N=90)

Lieu d'exercice	Il n'y a pas de demande	La demande a plutôt augmenté	La demande a plutôt diminué	La demande est restée stable	Je ne sais pas	N répondants
Hôpital	59.3%	25.9%	0.0%	11.1%	3.7%	27
Consultation de santé sexuelle ou service VCT +/- autre lieu d'exercice (hors Checkpoint)	41.7%	50.0%	0.0%	4.2%	4.2%	24
Cabinet médical (pratique privée)	47.4%	31.6%	0.0%	10.5%	10.5%	19
Checkpoint +/- autre lieu d'exercice	0.0%	90.9%	0.0%	9.1%	0.0%	11
Hôpital + cabinet médical (pratique privée)	60.0%	20.0%	0.0%	20.0%	0.0%	5
Consultation de prise en charge des addictions	50.0%	50.0%	0.0%	0.0%	0.0%	4
Total	44.4%	42.2%	0.0%	8.9%	4.4%	90
